

DON DAVIS

Angular Developer | Angular v16+ • TypeScript • RxJS • NgRx

+91 8547339847 • dondavis.davis55@gmail.com • Kochi, Kerala, India • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Angular Developer with 4 years of experience building and maintaining responsive, high-performance web applications using Angular (v10-v22, including v16+ standalone components and Signals), TypeScript, HTML5/CSS3, and RxJS. Strong in reactive state management with NgRx (Store, Effects, Entity) and component-based architecture. Experienced in REST API integration with HttpClient, interceptors, and JWT authentication, and in optimizing performance via lazy loading, OnPush change detection, and bundle splitting. Delivers in Agile/Scrum teams with Git workflows, peer code reviews, unit testing (Jasmine/Karma), and CI/CD pipelines. Recently shipped an enterprise fintech-style case-management platform on Angular 22 + NgRx (live demo below).

TECHNICAL SKILLS

Angular: Angular v10-v22 (v16+ standalone components, Signals, zoneless), Angular Material, Angular Universal (SSR), Angular CLI, Reactive Forms

Languages & Markup: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, SQL, Python

State Management & Reactive: NgRx (Store, Effects, Entity, Selectors), RxJS, Observables, Angular Signals

API Integration: RESTful APIs, HttpClient, HTTP interceptors, JWT authentication & silent token refresh, error handling, NestJS, Express.js

UI / Responsive Design: Mobile-first responsive design, Bootstrap, Tailwind CSS, cross-browser compatibility, accessibility, Figma-to-code

Performance: Lazy loading, OnPush change detection, code splitting, bundle optimization, Core Web Vitals

Testing & Quality: Jasmine, Karma, Jest, Cypress, ESLint, SOLID principles, code reviews, Chrome DevTools

DevOps & Tools: Git/GitHub, Azure DevOps, GitHub Actions CI/CD, Docker, AWS, npm, Webpack, JIRA

Methodologies: Agile (Scrum), sprint planning & estimation, peer code review, mentoring

PROFESSIONAL EXPERIENCE

Digital Analyst | The Elms, Retford, United Kingdom

Feb 2024 – Jan 2026

- Analysed website performance and user behaviour, and updated site content and structure to align with evolving business goals.
- Implemented on-page SEO improvements — keyword optimisation, metadata, and content updates — to increase search visibility and organic traffic.
- Developed audience targeting strategies by segmenting site visitors and tailoring content and campaigns to key customer groups.
- Produced data-driven business improvement plans with actionable recommendations on web presence, conversion, and customer engagement.
- Collected and analysed customer enquiry feedback, identifying recurring issues and translating them into website and service improvements.
- Reported findings and recommendations to business stakeholders, prioritising changes and verifying their impact after release.

Software Engineer | ThinkPalm Technologies Pvt. Ltd, Kerala, India

Feb 2021 – Sep 2022

- Led design and development of high-performance Angular applications, enforcing SOLID principles, component reusability, and industry best practices.
- Architected reusable Angular components and shared modules, accelerating delivery across multiple projects and improving maintainability.
- Spearheaded code reviews and Agile ceremonies (sprint planning, retrospectives), ensuring testable, high-quality releases.
- Acted as technical liaison between product managers and engineering, translating complex requirements into scalable frontend architecture; optimized AWS auto-scaling to improve availability.

Angular Developer | CIED Group Pvt. Ltd, Kerala, India

Aug 2020 – Dec 2020

- Led frontend development of a Human Resource Management System in Angular 10, applying core design patterns to streamline staff workflows.

- Built clean, maintainable, responsive mobile-first interfaces with Bootstrap and Tailwind CSS, driving a 40% improvement in user experience, delivered on schedule in an Agile/Scrum environment.

Software Developer | Travidux Technologies Pvt. Ltd, Kerala, India

Nov 2018 – Aug 2020

- Engineered data flows for a Point of Sale application by designing and integrating backend functionality through REST APIs, increasing client sales by 15%.
- Built interactive real-time dashboards and reports with Highcharts; refined UI/UX for data accuracy and visual clarity.

KEY PROJECTS

Enterprise Service Management Portal (ESMP) — fintech-style case & ticket management platform (portfolio project)

Live demo: <https://esmp-gnp8.onrender.com/> • **Source:** <https://github.com/DON-008/esmp>

- Enterprise case-management system modeled on claims-processing and citizen-services platforms: role-based access (Citizen, Agent, Supervisor, Admin), SLA monitoring, audit logging, and reporting dashboards.
- Angular 22 with standalone components, Signals, and zoneless change detection; global state via NgRx (Store, Effects, Entity) with optimistic UI updates and memoized selectors; local state via Signals.
- REST integration against a NestJS (Node.js/Express) modular backend with TypeORM; JWT authentication with HTTP-only refresh tokens, auth/error interceptors, and route guards (AuthGuard/RoleGuard).
- Quality pipeline: Jasmine/Karma and Jest unit tests (80% coverage target on services and NgRx logic), Cypress E2E, ESLint, and GitHub Actions CI/CD; deployed on Render.

HRMS – Human Resource Management System | mygian.mygoal.biz

- Angular HRMS covering employee management, payroll, attendance, shift and leave management, and recruitment.

POS – Point of Sale & BI Suite | pos.mygian.mygoal.biz, mygoal.biz

- End-to-end sales platform (stock, invoicing, payments, reporting, analytics dashboard) and enquiry-driven BI web app with multi-dimensional reporting.

Universal AI Chatbot Suite | thinkpalm.com

- Plug-and-play chatbot UI for third-party website integration with an admin dashboard for bot training and analytics; built with Angular Material for a responsive, accessible experience.

EDUCATION

M.Sc. Computing (Distinction) – De Montfort University, Leicester, UK – 2024

B.Tech in Computer Science – Mahatma Gandhi University, Kottayam, India – 2018

CERTIFICATIONS

- IBM Full Stack Software Developer Professional Certificate
- Angular (Basic) – HackerRank
- Introduction to Containers with Docker, Kubernetes & OpenShift – IBM
- Python for Data Science, AI & Development – IBM / Coursera
